Surabaya, Jawa Timur, Indonesia.

Hello! My name is Azzahra, a 5th-semester Information Systems student passionate about front-end development. I enjoy creating interactive and responsive user interfaces using HTML, CSS, and JavaScript, and I'm currently learning React and Tailwind. I have a keen interest in project management and UI/UX design, alongside strong problem-solving abilities, excellent attention to detail, and effective communication skills. I am very enthusiastic about starting a career in front-end development and creating engaging designs with enjoyable user experiences.

Project Based Learning

Web Programming Course

May 2024 -

Final Project

Created a web application to promote sustainable development in rural areas, aligning with the Sustainable Development Goals (SDGs).

- Identified the needs of a smart village initiative for sustainable development.
- Developed a responsive web application using HTML and Bootstrap.
- Designed an engaging, user-friendly interface to support project goals.

Desktop Programming Course

Dec 2023 -

Final Project

Developed a comprehensive application to support the operational activities of an UMKM, specifically Kuquruyuk, a tenant in my university's canteen.

- Identified and analyzed UMKM operational needs.
- Developed using Visual Studio 2022 and MySQL for integrated relational database concepts, and implemented Crystal Reports for detailed reporting.
- Created an engaging, visually appealing UI with attractive colors and graphics to enhance user experience.

Human-Computer Interaction Course

Dec 2023 -

Final Project

Developed a mobile application to streamline the buying and selling of vegetables, utilizing design thinking principles and Figma for interface design.

- Conducted a comprehensive user needs analysis with feedback from 50 potential users.
- Designed the app interface using design thinking principles.
- Performed extensive usability testing with 20 users.
